

Capture the Flag 2: Widgets

Goal: Turn the single-card application into a simple multi-section interface.

Note from the instructor before you start:

These activities involve using your own problem solving and researching skills. We are strictly to implement NOT TO USE AI to generate the code for you. You may only use AI for RESEARCHING the syntax or usage, but NEVER THE CODE ITSELF.

Consequence: Immediate 0 score in your grade for this activity.

(I know what AI-generated code looks like, don't even think about it :>)

🚩 Flag 0 – Create Your Feature Branch

Objective: Create a feature branch before modifying your application. Name the branch feature/widgets

Screenshot:

- Terminal showing `feature/widgets`

The screenshot shows an IDE with a Dart file named `main.dart` and a terminal window. The Dart code defines a `MyApp` class extending `StatelessWidget`. The `build` method returns a `MaterialApp` with the title 'My First Flutter Application', debug mode disabled, and a dark theme. The terminal window shows the output of running the application, including logs from the Flutter engine and the Android system, and the successful execution of `git checkout -b feature/widgets` in a PowerShell terminal.

```
lib > main.dart > MyHomePage
>
6
7 class MyApp extends StatelessWidget {
8   const MyApp({super.key});
9
10  @override
11  Widget build(BuildContext context) {
12    return MaterialApp(
13      title: 'My First Flutter Application',
14      debugShowCheckedModeBanner: false,
15      theme: ThemeData(
16        colorScheme: ColorScheme.fromSeed(
17          seedColor: const Color(0xFF800000),
18          brightness: Brightness.dark,
19        ), // ColorScheme.fromSeed
20      ), // ThemeData
21    );
22  }
23 }

🚩 Flag 1 – Break It Apart

Objective: Separate your profile information into individual `Text` widgets.

If your card currently looks like this:

```
Text(  
  'Chiara Marie C. Canque\n'  
  'BSIT - 3\n'  
  'My First Flutter Application\n'  
  'August 11, 2026',  
)
```

Your task: Separate each piece of information into its own `Text` widget.

You should have something conceptually like:

`Text` → Name

`Text` → Course & Section

`Text` → Application Title

`Text` → Date

Do not worry about making it pretty yet.

Screenshot:

- Your code showing the separate `Text` widgets
- Your application

```

64 child: Padding(
65   padding: const EdgeInsets.symmetric(vertical: 30.0, horizontal: 25.0),
66   child: Column(
67     mainAxisAlignment: MainAxisAlignment.min,
68     mainAxisSize: MainAxisSize.center,
69     children: [
70       // Circular ID Profile Picture
71       ClipOval(
72         child: Image.asset(
73           'assets/ID PIC.png',
74           width: 120,
75           height: 120,
76           fit: BoxFit.cover,
77         ), // Image.asset
78       ), // ClipOval
79       const SizedBox(height: 20),
80       const Text(
81         "Martin Jonas A. Aranzado",
82         textAlign: TextAlign.center,
83         style: TextStyle(
84           fontSize: 22,
85           fontWeight: FontWeight.bold,
86           color: Colors.white,
87         ), // TextStyle
88       ), // Text
89       const SizedBox(height: 12),
90       const Text(
91         "BSIT - 3",
92         style: TextStyle(
93           fontSize: 18,
94           fontWeight: FontWeight.w500,
95           color: Colors.white70,
96         ), // TextStyle
97       ), // Text
98       const SizedBox(height: 12),
99       const Text(
100        "My First Flutter Application",
101        textAlign: TextAlign.center,
102        style: TextStyle(
103          fontSize: 16,
104          fontStyle: FontStyle.italic,
105          color: Colors.white,
106        ), // TextStyle
107       ), // Text
108       const SizedBox(height: 12),
109       const Text(
110        "August 1, 2026",
111        style: TextStyle(
112          fontSize: 15,
113          color: Colors.white60,
114        ), // TextStyle
115       ), // Text
116     ],
117   ),
118 ),

```

🚩 Flag 2 – Stack the Information

Objective: Arrange your individual `Text` widgets vertically.

Research how to use:

`Column()`

Place your information inside the `Column`.

Your card should now have:

Name

Course & Section

Application Title

Date

Screenshot:

- The `Column` in your code
- The four separate pieces of information displayed vertically

```

56 color: Colors.black88,
57 shape: RoundedRectangleBorder(
58   borderRadius: BorderRadius.circular(20),
59   side: const BorderSide(
60     color: Colors.black88,
61     width: 1.5,
62   ), // BorderSide
63 ), // RoundedRectangleBorder
64 child: Padding(
65   padding: const EdgeInsets.symmetric(vertical: 30.0, horizontal: 25.0),
66   child: Column(
67     mainAxisAlignment: MainAxisAlignment.min,
68     mainAxisSize: MainAxisSize.center,
69     children: [
70       // Circular ID Profile Picture
71       ClipOval(
72         child: Image.asset(
73           'assets/ID ID PIC.png',
74           width: 120,
75           height: 120,
76           fit: BoxFit.cover,
77         ), // Image.asset
78       ), // ClipOval
79       const SizedBox(height: 20),
80       const Text(
81         'Martin Jonas A. Aranzado',
82         textAlign: TextAlign.center,
83         style: TextStyle(
84           fontSize: 22,
85           fontWeight: FontWeight.bold,
86           color: Colors.white,
87         ), // TextStyle
88       ), // Text
89       const SizedBox(height: 12),
90       const Text(
91         'BSIT - 3',
92         style: TextStyle(
93           fontSize: 18,
94           fontWeight: FontWeight.w400,
95           color: Colors.white70,
96         ), // TextStyle
97       ), // Text
98       const SizedBox(height: 12),
99       const Text(
100        'My First Flutter Application',
101        textAlign: TextAlign.center,
102        style: TextStyle(
103          fontSize: 16,
104          fontStyle: FontStyle.italic,
105          color: Colors.white,
106        ), // TextStyle
107      ), // Text
108      const SizedBox(height: 12),
109      const Text(
110        'August 1, 2026',
111        style: TextStyle(
112          fontSize: 14,
113          color: Colors.white54,
114        ), // TextStyle
115      ), // Text

```

🚩 Flag 3 – Add Another Element

Objective: Add another individual widget to your **Column**.

Add something that belongs to your profile.

Examples:

Hobby

It must be its **own widget**, not additional text inside another **Text**.

Screenshot:

- New widget in your **Column**
- Updated application

```
const SizedBox(height: 12),
const Text(
  'Nicknames: MJ or Emjay',
  style: TextStyle(
    fontSize: 15,
    fontFamily: 'Helvetica',
    color: Colors.white,
  ) // TextStyle
) // Text
```

🚩 Flag 4 – Put Two Things Side-by-Side

Objective: Discover the `Row` widget.

Create a new section containing **two pieces of information beside each other**.

For example:

Age: 21 Birthdate: August 11, 2003

Research:

`Row()`

Place the `Row` inside your existing `Column`.

Your structure should now resemble:

`Column`

`├── Text`

`├── Text`

Text

Text

Text

Row

Text

Text

Screenshot:

- Your widget structure/code
- The two items displayed side-by-side

🚩 Flag 5 – Give It Some Space

Objective: Improve the spacing between your widgets.

Research:

SizedBox()

Add appropriate spacing between your:

- Image
- Name
- Course
- Other information
- Row

Challenge: Make the card easier to read **without changing its colors or fonts yet.**

Screenshot:

- **SizedBox** usage
- Updated application

🚩 Flag 6 – Make It Look Better

Objective: Apply styling to your individual widgets.

Now that your information is properly separated and positioned, improve the visual hierarchy.

Research how to modify:

`TextStyle()`

Apply different styling to at least **three** elements.

For example:

- Name → larger and bold
- Course → medium size
- Date → smaller
- Application title → italic

Screenshot:

- Your `TextStyle` changes
- Updated application

```
const SizedBox(height: 20),
const Text(
  'Martin Jonas A. Aranzado',
  textAlign: TextAlign.center,
  style: TextStyle(
    fontSize: 24,
    fontWeight: FontWeight.bold,
    fontFamily: 'Montserrat',
    color: Colors.yellow,
  ), // TextStyle
), // Text
```

```
const SizedBox(height: 12),
const Text(
  'BSIT - 3',
  style: TextStyle(
    fontSize: 20,
    fontWeight: FontWeight.w500,
    fontFamily: 'Helvetica',
    color: Colors.white70,
  ), // TextStyle
), // Text
```

```
const SizedBox(height: 12),
const Text(
  'My First Flutter Application',
  textAlign: TextAlign.center,
  style: TextStyle(
    fontSize: 18,
    fontStyle: FontStyle.italic,
    fontFamily: 'Helvetica',
    color: Colors.white,
  ), // TextStyle
), // Text
```

🚩 Flag 7 – Improve the Layout

Objective: Control the alignment of your widgets.

Research the properties of `Column` and `Row`.

Experiment with:

`mainAxisAlignment`

`crossAxisAlignment`

Change the alignment of your content so the card looks intentional rather than simply stacked.

Screenshot:

- The properties you changed
- Updated application

```
child: Column(
  mainAxisAlignment: MainAxisAlignment.min,
  mainAxisAlignment: MainAxisAlignment.center,
  crossAxisAlignment: CrossAxisAlignment.start,
  children: [
    // Circular ID Profile Picture
```

```
const Row(
  mainAxisAlignment: MainAxisAlignment.start,
  crossAxisAlignment: CrossAxisAlignment.start,
  children: [
```

🚩 Flag 8 – Create a Second Card

Objective: Apply what you learned to create another section.

Create a second **Card** containing something different from your profile.

For example:

My Favorites

Favorite Game

Favorite Food

Favorite Movie

The second card should also use:

- Individual **Text** widgets
- A **Column**
- At least one **Row**
- Spacing

Screenshot:

- Code for the second card

- [illegible]

You now have:

- The widget containing both Cards
- Both cards visible in the application

```
body: SingleChildScrollView(
  child: Padding(
    padding: const EdgeInsets.all(20.0),
    child: Column(
      children: [
        Card(
```

```
Card(
  elevation: 8,
  color: const Color(0xFF2A0808),
  shape: RoundedRectangleBorder(
    borderRadius: BorderRadius.circular(20),
    side: const BorderSide(
      color: Color(0xFFFFD700),
      width: 1.5,
```

🚩 Flag 10 – Widget Discovery

Objective: Discover a Flutter widget independently.

Research the Flutter widget catalog and find **one widget you haven't used yet**.

Examples:

- Icon
- Divider
- CircleAvatar
- Chip
- ElevatedButton

Add it somewhere appropriate in your application.

Screenshot:

- Your newly discovered widget in the code
- The widget visible in the application

```
const SizedBox(height: 10),  
const Divider(  
  color:  Color(0xFFFFD700),  
  thickness: 1,  
), // Divider
```

🚩 Flag 11 – Real Phone Test 📱

Objective: Run your completed application on a **physical** Android phone.

Research how to run Flutter on your phone.

Screenshot:

- Your completed application running on the physical phone (screenshot from your actual phone)

🚩 Flag 12 – Save Your Progress

Objective: Commit your completed Widget branch.

Follow proper standards of commit messages

Screenshot:

- Successful commit
- `feature/widgets` branch

```
